## DIAMOND V CONTINUES EXPANSION PLANS

CEDAR RAPIDS, IOWA (June 22, 2008) -- Diamond V announced today they are on schedule to build their second manufacturing facility in Cedar Rapids. This new 28,000 square foot state-of-the-art facility will enhance Diamond V's ability to better service its customers and keep pace with growing demand in both the U.S. and around the world. Adding this new facility will allow the company to meet the rapidly growing demand for proprietary products in all species of animals and aqua, and also enhance their ability to continue to bring innovation to the marketplace. This facility will be fully operational in 2009.

Diamond V expects to resume manufacturing capability with its existing plant soon. Although the scale and severity of the Cedar Rapids flood was unprecedented, the company's clean-up and recovery plan is ahead of schedule. As always, it is Diamond V's number one priority to supply our customers with quality products and services in a timely manner. We will keep our customers informed of developments and work expediently to restore the excellent service all have come to expect from Diamond V. This plant will remain operational when the new facility comes on-line in 2009.

Diamond V Technologies is the world's leading supplier of fermented yeast products used to optimize digestive function and nutrition key to animal and aqua health, productivity, efficiency and profitability. Diamond V's original Yeast Culture has been a trusted feed ingredient component for 64 years and is marketed in more than 40 countries worldwide.
